St. Joseph’s School Sorrento
Digital Technology and Acceptable Use Policy

1. Rationale

The use of digital technologies at St Joseph’s School is to enhance learning in a supportive school environment. The school is committed to providing an education that encourages and teaches the positive use of digital technologies and promotes safe and responsible online behaviour. This is most successful with collaboration between parents/guardians and the school working together to encourage a positive student use of technologies for learning and collaborating.

St Joseph’s School recognises its duty of care to the wellbeing of students and believes the teaching of cyber safety and responsible online behaviour is essential to developing knowledge and understanding of ethical obligations. This also extends to protecting the privacy of all students by addressing current issues, including cyber-bullying and online privacy. To be safe online and to gain the greatest benefit from the opportunities provided through an online environment, students need to do the right thing by themselves and others online, particularly when no one is watching.

Whilst St Joseph’s endeavours to avoid any inappropriate material, through caching, pre-selection of sites, screening programs and staff supervision, it is impossible to control all material on a global network and St Joseph’s School assumes no responsibility should a user access inappropriate information. Students using the Internet or digital technologies have the responsibility to report inappropriate behaviour and material to their supervisors. Misuse of the Internet or digital technologies will result in disciplinary action in line with St Joseph’s discipline policy.

It is important for St Joseph’s students to develop the skills necessary to become responsible, reliable and respectful users of technologies. They must be accountable and responsible for their actions when using digital technologies by abiding by the User Agreement.

At St Joseph’s School we:

- Use the schools four values of respect, learning, teamwork and honesty to outline the expected behaviours on digital technologies.
- Provide a filtered internet service.
- Provide access to educational websites and apps that have been teacher recommended and reviewed.
- Provide supervision and direction in online activities and when using digital technologies for learning.
- Have a cybersafety program at the school which is reinforced across the school (eSmart).
- Support parents/guardians to understand the importance of safe and responsible use of digital technologies, the potential issues that surround their use and strategies that they can implement at home to support their child.
- Work with students to outline and reinforce the expected behaviours on the internet.

2. Student Agreement

When I use digital technology I agree to:

2.1 Be a safe, responsible and ethical user whenever and wherever I use it.
2.2 Only use the computers, iPads or any other technology as I have been directed by the teacher.
2.3 Ask a teacher if I am unsure whether I am allowed to do something involving technology.
2.4 If I have my own user name, log on only with that user name. I will not allow anyone else to use my user name.
2.5 Not tell anyone else my password.
2.6 Not change the data and work of another student.
2.7 Protect my privacy rights and those of other students by not giving out personal details including full names, telephone numbers, addresses and images.
2.8 Only go online or access the Internet at school when a teacher gives permission and an adult is present.
2.9 Be respectful in how I communicate with others and never be mean, rude, offensive, or to bully, harass, or in any way harm anyone else, even if it’s meant as a ‘joke’ (this includes forwarding messages and supporting others in harmful, inappropriate or hurtful online behaviour).
2.10 Be respectful talk to a teacher if I feel uncomfortable or unsafe online or see others participating in unsafe, inappropriate or hurtful online behaviour.
2.11 Respect all school technology equipment and will treat all devices with care. This includes:
   - Not changing any settings including but not limited to screen savers, backgrounds, passcodes, screen brightness or sounds.
   - Not attempting to hack or gain unauthorised access to any system
   - Following all school cybersafety rules, and not joining in if other students choose to be irresponsible with ICT.
   - Keeping covers on iPads.
   - Using all equipment with care.
   - Reporting any breakages/damage to a staff member.

While at school using digital technology, I will not:

2.12 Attempt to search for things online I know are not acceptable at our school. This could include anything that is rude or violent or uses unacceptable language such as swearing.
2.13 Make any attempt to get around, or bypass, security, monitoring and filtering that is in place at our school.
2.13 If I find anything inappropriate online, I will:
   - Not show others
   - Turn off the screen
   - Get a teacher straight away.
2.14 Download or copy any files such as music, videos, games or programmes without the permission of a teacher. This is to ensure we are following copyright laws.
I understand that if I break these rules, the school may need to inform my parents. In serious cases the school may take disciplinary action against me.

I agree to the conditions set forth in the St Joseph’s School Digital Technology and Acceptable use Policy.
